

FOR IMMEDIATE RELEASE

BTI's NEW All-in-One Pressure Relief Valve

One Pressure Relief Valve that does it all.

Bulk Tank Inc. of Park Hills, Missouri announced the development of a new pressure release valve for pneumatic conveying tank trailers. The American made All-in-One Pressure Relief valve derives its name from its unique ability to function in various applications. Typically relief valves were constructed for a specific task; blower or tank installations, high or low temperatures, food grade or non-food grade. The All-in-One is constructed for use in all these situations.

BTI's All-in-One Pressure Relief is available in 2 or 3-inch sizes and adjustable, fixed or manual release pressure models. They have a pressure rating of 5-30 psi and are available with a male cam lock fitting, male anodized threads or female anodized threads.

The All-in-One features an FDA approved seat and tamper proof seal to ensure that the operator does not change the pressure setting specified.

100% American made, the new All-in-One Pressure Relief Valve is available for immediate shipment. This is another exciting example of BTI's innovative product design and, as with all of its products, Bulk Tank, Inc. unconditionally guarantees this product will outperform any similar product on the market today.
